ANNUALS

NEW African Marigold F1 Marvel II™ Series

• This new intermediate-type African marigold offers improved branching, earliness, flower size and a brighter flower colour.

• Series is uniform under both short and long days.

\bigcirc

Height: 41 to 46 cm/ 16 to 18 in. Spread: 25 to 30 cm/ 10 to 12 in. Plug crop time: 3 weeks Transplant to finish: 6 to 7 weeks Seed supplied as: Coated, De-tailed with 85% Min. Germ. Standard

NEW African Marigold F1 Marvel II[™] Series

NEW Gold

NEW Orange

NEW Yellow

Also available in NEW Mixture including all three colours: NEW Gold, NEW Orange and NEW Yellow

Angelonia F1 Serena[®] Series

Angelonia F1 Serena[®] Series

- Serena fills gardens, landscapes and mixed containers with unique dimensional colour.
- Care-free, continuous bloomer performs well under a wide range of conditions.
- Durable series is a perfect choice for consumers looking for water-wise, heat-loving plants.
- Plants grow up to 50% larger in southern climates.

\mathbf{C}

Height: 41 to 51 cm/16 to 20 in. Spread: 30 to 36 cm/12 to 14 in. Plug crop time: 5 to 6 weeks Transplant to finish: 8 to 9 weeks Seed supplied as: Pelleted

Angelonia F1 Serena[®] Series

NEW Blue Improved:

- This light blue flower with a white throat is a lighter blue colour than original Blue, and is closer to a true blue.
- It is one week earlier to flower, and it offers more uniformity and improved production.

NEW Purple Improved:

- Features a deeper, more intense purple colour than original Purple.
- Earlier flowering and improved production.

Angelonia F1 Serena[®] Series

NEW Blue Improved

White

NEW Purple Improved

Mixture

Rose

Waterfall Mixture

Angelonia F1 Serenita[®] Series

 Serenita has all the good looks, durability and easy production of Serena – with a few additional benefits.

- Excellent solution where shorter and more manageable material is needed.
- Peak performer in climate with very hot/humid night temperatures.
- Great for high-density production.
- Grow Serenita with less to no PGRs for cost savings.

Height: 30 to 36 cm/12 to 14 in. Spread: 30 to 36 cm/12 to 14 in. Plug crop time: 5 to 6 weeks Transplant to finish: 8 to 9 weeks Seed supplied as: Pelleted

Angelonia F1 Serenita[®] Series

NEW Lavender

Lavender Pink

Pink

Purple

Raspberry

Rose

Sky Blue

White

Mixture

NEW Lavender: This new colour in the Serenita series offers true lavender flower colour. It is one week earlier to flower compared to Lavender Pink, with fast secondary flowering and good fill.

Celosia First Flame™ Series

• Excellent, brightly coloured summer crop finishes 10 to 14 days earlier than competing varieties to reduce production costs.

• Uniform across all colours for a fuller look in containers.

• Makes a great border plant, also good in containers.

$\overline{}$

Height: 25 to 36 cm/10 to 14 in. Spread: 25 to 41 cm/10 to 16 in. Plug crop time: 3 to 4 weeks Transplant to finish: 8 to 10 weeks Seed supplied as: Raw, Pelleted with 80% Min. Germ. Standard

Celosia First Flame™ Series

Purple

NEW Yellow Improved

Red

Mixture

Scarlet

NEW Yellow Improved: Fits the series better for timing and improved in leaf quality.

NEW Foliage Celosia Sol[™] Collection

- An attractive new foliage celosia collection for the market!
- Two distinct bicolour foliage patterns are featured in the collection.
- Offers relatively fast production time and no downy mildew issues.

\bigcirc

Height: 25 to 36 cm/10 to 14 in. Spread: 25 to 41 cm/10 to 16 in. Plug crop time: 3 to 4 weeks Transplant to finish: Spring, 7 to 10 weeks

Seed supplied as: Pelleted with 80% Min. Germ. Standard

NEW Foliage Celosia Sol[™] Collection

NEW Gekko Green: Foliage tends to be more green when kept indoors, and it turns to burgundy when the plant is left outdoors for at least 1 to 2 weeks.

NEW Lizzard Leaf: Foliage tends to be more green when kept indoors, and it turns to burgundy-red when the plant is left outdoors for at least 1 to 2 weeks. Leaves tend to curl due to genetics and could be modified by the climate conditions found in different locations in different degrees, in both indoor and outdoor environments.

NEW Select Mixture

NEW Impatiens F1 Beacon[®] Series

- 1. NEW Bright Red A warm-toned red on upright mounded, moderately vigorous plants with mid-green foliage. Plant vigour is slightly larger than Super Elfin XP Red, and the flower size is slightly smaller.
- 2. NEW Coral Coral-pink flowers on mid-vigour, mounded plants with bright green foliage.
- **3.** NEW Orange A bright, clean orange on moderate-vigour, upright mounded plants with bright green foliage. Plant height, vigour and flower size are similar to Super Elfin Bright Orange.
- **4. NEW Salmon** A warm salmon-orange flower on mid-vigour, mounded plants with bright green foliage.
- 5. NEW Violet Shades Shades of bright violet and burgundy-violet on moderate-vigour, upright mounded plants with mid-green foliage. More vigorous with the same flower size as Super Elfin XP Violet.
- **6. NEW White** Pure white flowers on moderately vigorous, upright mounded plants with midgreen foliage. Features more plant vigour with the same flower size as Super Elfin XP White.
- 7. NEW Red White Mixture Bright Red, White.
- 8. NEW Select Mixture Bright Red, Coral, Orange, Salmon, Violet Shades, White.

Pentas F1 Glitterati™ Series

- Distinctive star pattern combines easily with other varieties
- Finishes fast for speed to market, and followup blooming keeps the plants in full colour and looking good all season.
- 1 week earlier than Purple Star

NEW Red Star: Unique combination of red and white

$\overline{}$

Height: 12 to 22 in./30 to 56 cm Spread: 10 to 18 in./25 to 46 cm Plug crop time: 6 to 7 weeks Transplant to finish: 8 to 10 weeks Seed supplied as: Pelleted with 85% Min. Germ. Standard

Pentas F1 Glitterati™ Series

NEW Red Star

Spreading Petunia F1 Easy Wave[®] Series

NEW Rose Fusion:

- Mid-rose blooms with deep rose veins.
- Short-day flowering requirement of 9 hours.
- Creates early-season sales opportunities.

Spreading Petunia F1 Wave[®] Series

• Virtually care-free, the plants bloom like crazy all season, with masses of flowers along the entire length of each branch with no trimming back.

• Wave petunias stand up well to both heat and cooler conditions, and perform better than most petunias when Botrytis is present.

• Recommended in Wave branded packaging: 15-cm/6-in. pots, large containers, hanging baskets.

Height: 13 to 18 cm/5 to 7 in. Spread: 91 to 122 cm/36 to 48 in. Plug crop time: 4 to 6 weeks Transplant to finish: Spring 7 to 9 weeks, Summer 5 to 7 weeks Seed supplied as: Pelleted

Purple Classic

NEW Carmine Velour: Vivid, hot carmine-cherry colour on vigorous, flat, spreading plants.

- 13 hours daylength required. Cold durable.
- All-American Selections Winner.

NEW Spreading Petunia F1 Wave Carmine Velour Landscape Performance

NEW Wave Carmine Velour (R) has the same flat, free-flowering and strong garden performance as Wave Pink (L). Illinois, USA Week 32, 2017

NEW Wave Carmine Velour shows strong garden performance in Illinois, USA Week 30, 2018

Spreading Petunia F1 Shock Wave[®] Series

• Blooms in a tight, consistent, 4 to 6-day window.

• Rebounds faster from overhead watering and rain than other petunias – stays fresher-looking at retail and outdoors.

- Performs equally well in small spaces, baskets, containers and mixed combos.
- Mounded, spreading plants are similar in shape and just as easy to manage as Easy Wave[®] petunia.
- Recommended in Wave branded packaging: 10-cm/4-in. pots, 306 premium packs with handle, hanging baskets.

C

Height: 18 to 25 cm/7 to 10 in. **Spread:** 76 to 91 cm/30 to 36 in. **Plug crop time:** 4 to 6 weeks Transplant to finish: Spring 5 to 6 weeks, Summer 4 to 5 weeks Seed supplied as: Pelleted

Spreading Petunia F1 Shock Wave[®] Series

NEW Purple Tie Dye:

- Inconsistent purple-blue and white bicolour pattern is appealing to consumers.
- Pattern changes based on temperature, light levels and Plant Growth Regulators (PGRs) used.
- Daminozide use will result in more white showing on the blooms.
- 10.5-hour daylength required.

ANNUALS

Vinca Tattoo™ Series

- Very floriferous and well-branched plants display one-of-a-kind flowers.
- Tight flowering window with an easy-togrow, uniform, upright habit across all colours.
- Outstanding in hot and sunny conditions.

\bigcirc

Height: 25 to 36 cm/10 to 14 in. **Spread:** 15 to 20 cm/6 to 8 in. **Plug crop time:** 5 weeks Transplant to finish: 5 to 6 weeks Seed supplied as: Raw with 85% Min. Germ. Standard

Vinca Tattoo[™] Series

NEW Blueberry A unique colour perfect for combining with other plants to create heat-loving red, white and blue mixes.

NEW American Pie Mixture: Includes **NEW** Tattoo Blueberry, plus Pacifica Red and White.

- Tattoo blooms display the best colour contrast under warm conditions with moderate light;
- colours lighten with increased temperatures and light.
- Grown under cooler conditions and lower light, colours appear darker overall with less contrast and more purple colouration being expressed.

ANNUALS

Viola F1 Quicktime[™] Series

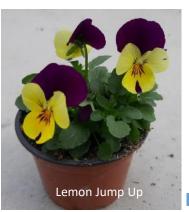

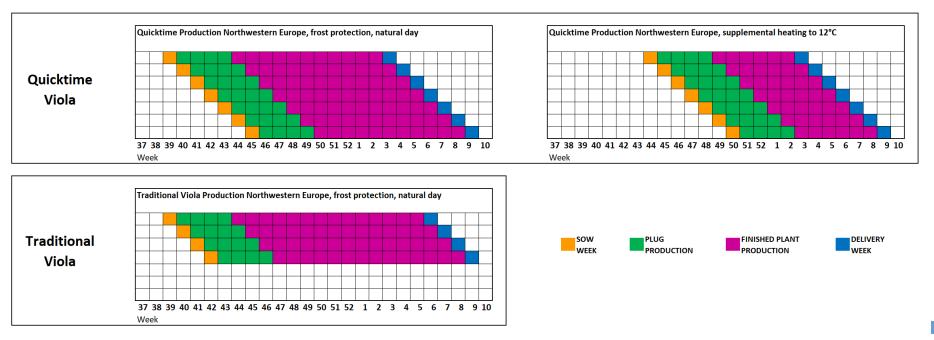

Quicktime is programable for these 3 uses:

- 1. Reducing crop time to save money and adding flexibility with space. Late potting (e.g. week 50), and still hit peak Viola spring season (week 9-10).
- 2. Fill late opportunity contract orders that couldn't be met using traditional violas.
- 3. First to market with attractive colors in the earliest weeks of spring.

Perennials from PanAmerican Seed®

PERENNIALS

NEW Aquilegia F1 Earlybird[™] Series

- Strong, new colours and colour combinations
- Low cold requirement and short juvenility for growing in warm Winter climates.
- Features a controlled habit, with relatively short stems on well-mounded plants.
- A flowering window of 10 to 12 days make it an excellent choice for early Spring programs.

Height: 23 to 28 cm/9 to 11 in. **Spread:** 20 to 25 cm/8 to 10 in. Plug crop time: 6 to 9 weeks

Transplant to finish: 12 to 16 weeks Seed supplied as: Raw

KieftSeed

NEW Aquilegia F1 Earlybird[™] Series

NEW Blue White

Features a slightly more slender plant habit compared to the rest of the series.

NEW Purple White

Flowers 2 to 3 days earlier than the rest of the series.

NEW Purple Yellow

Flowers 5 to 7 days later than the series average, and is 5 cm (2 in.) taller.

NEW Mixture

NEW Arabis Barranca[™] Series

• The Barranca Series offers two colours in *A*. *blepharophylla*, producing a highly uniform crop that is short-stemmed with a lot of flower power.

• Pink is a unique colour in this floriferous, early-Spring flowering perennial.

\mathbf{C}

Height: 15 to 20 cm/6 to 8 in. **Spread:** 18 to 20 cm/7 to 8 in. **Plug crop time:** 6 to 8 weeks Transplant to finish: 26 to 32 weeks Seed supplied as: Raw with 80% Min. Germ. Standard

NEW Arabis Barranca[™] Series

NEW Deep Rose

NEW Pink 3 to 5 days earlier than Deep Rose, with more clear green foliage.

NEW Deep Rose

NEW Aurinia Gold Rush

- Shorter-stemmed Aurinia features a more uniform plant habit and earlier flowering than the competition.
- Evergreen early-Spring flowering perennial forms neat rosettes.

\bigcirc

Height: 13 to 20 cm/5 to 8 in. **Spread:** 13 to 20 cm/5 to 8 in. **Plug crop time:** 6 to 7 weeks Transplant to finish: 26 to 32 weeks Seed supplied as: Raw with 80% Min. Germ. Standard

PERENNIALS FROM PANAMERICAN SEED

Lobelia F1 Starship[™] Series

- Earlier flowering; improved branching; low stretch; uniform, controlled habit; and huge flower power
- Good Summer crop for landscape programs prefers higher temperatures, humidity and moisture.
- Good germination and plug yield.
- Versatile series works well from 13-cm/5-in. pots to higher-value containers.
- Performs well in both annual and perennial combos.
- Attracts hummingbirds and butterflies.

(

Height: 51 to 61 cm/20 to 24 in. Spread: 8 to 12 in./20 to 30 cm Plug crop time (288 tray): Scarlet, 7 to 9 weeks; all others, 8 to 10 weeks Transplant to finish: 14 to 18 weeks Seed supplied as: Pelleted with 70% Min. Germ. Standard

Lobelia F1 Starship[™] Series

NEW Blue

NEW Burgundy

NEW Scarlet Bronze Leaf

NEW Blue: This variety has a height of 61 to 71 cm/24 to 28 in., which is 15 to 20 cm/6 to 8 in. taller than the rest of the series. It also has green leaves, in contrast to the bronze leaves of the other varieties.

NEW Burgundy: Features the same habit as Scarlet and Deep Rose.

NEW Scarlet Bronze Leaf: The most bronze-leafed variety in the series grows to 61 to 66 cm/ 24 to 26 in. in height, about 13 to 15 cm/ 4 to 6 in. taller than Scarlet, and is one week later to flower. Replaces Vulcan Red, which was 3 weeks later to flower than the series. Features an in-demand combination of deep bronze leaves with intense scarlet flower power.

CUT FLOWERS

Anemone F1 Mona Lisa[®] Series

• A masterpiece among anemones: Mona Lisa puts out up to 18 flowers per plant...flowers under lower Winter light levels...doesn't need staking, netting or disbudding.

• 10 to 12-cm/4 to 4.5-in. blooms top sturdy 18in./45-cm stems that are ideal for cutting and design work.

• Well-suited for young plant production from March to April sowing.

• Low temperatures (8 to 12°C/46 to 54°F) promote optimum stem length for cut flower production.

Height: 25 to 46 cm/10 to 18 in. Plug crop time: 8 weeks Transplant to finish: 12 weeks **Seed supplied as:** Raw with 80% Min. Germ. Standard

NEW Orchid Shades Improved: Improved germination and uniformity over original Orchid Shades, with similar colour shades and crop time.

NEW Grass Panicum Capillare Frosted Explosion

- This easy-to-grow grass adds a delicate texture to any bouquet.
- Facultative short day flowering response; daylength extension is recommended where appropriate to ensure good stem length.
- Harvest stems when seed heads are green all the way to bronze tinged.
- Stems last 10 to 14 days in a vase.

\bigcirc

Height: 61 to 76 cm/24 to 30 in. Plug crop time: 4 to 5 weeks Transplant to finish: 8 to 12 weeks Seed supplied as: Multi-Seed Pellets with 80% Min. Germ. Standard

NEW Lisianthus F1 Can Can Purple

- A later-flowering, spray-type lisianthus with a highly filled flower in a deep purple-blue colour.
- Produces a spray of flowers on the top of each stem that opens within a short window, giving a bouquet effect to every stem.
- Labour savings with no pinching needed.
- Full spray effect may reduce the number of stems needed for floral arrangements.

(

Height: 91 to 114 cm/36 to 45 in. Plug crop time: 8 to 10 weeks Transplant to finish: Winter, 14 to 18 weeks; Spring/Autumn, 12 to 14 weeks; Summer, 10 to 12 weeks Seed supplied as: Pelleted with 80% Min. Germ. Standard

Lisianthus F1 Flare Series

• The best spray-type lisianthus series – Flare produces a spray of flowers on the top of each stem that opens within a short window, giving a bouquet effect to every stem.

• Labour savings, thanks to no pinching needed.

• Full spray effect may reduce the number of stems needed for floral arrangements.

C

Height: 91 to 114 cm/36 to 45 in. Plug crop time: 8 to 10 weeks Transplant to finish: Winter, 14 to 18 weeks; Spring/Autumn, 12 to 14 weeks; Summer, 10 to 12 weeks Seed supplied as: Pelleted with 80% Min. Germ. Standard

POT PLANTS

HANDPICKED VEGETABLES & HERBS

NEW Eggplant F1 Asian Delite

- Slender, elongated eggplants are glossy with bright purple skin and white, tender, non-bitter flesh.
- Fruit can be sliced lengthwise for grilling or lightly frying, and tender skin does not need to be peeled.
- Sliced or diced fruit is great for a stir-fry or curry; its nonbitter flavour and tender texture will compliment any sauce.
- Plants are upright and semi-spineless, so they are very easy and painless to harvest.
- Great in an in-ground garden or large container.

 $\overline{}$

Height: 61 to 107 cm/24 to 42 in. Spread: 61 to 91 cm/24 to 36 in. Days to maturity from transplant: 50-55 Seed supplied as: Raw with 85% Min. Germ. Standard

NEW Pepper F1 Peppi Series

- This small, pointed fruit offers incredible sweetness and rich flavour.
- The fruit are often seedless, and are great for snacking fresh off the plant, adding to a lunchbox or on an appetizer platter without having to eat around the seeds.
- To produce seedless fruit, grow it in isolation from other (non-seedless) pepper varieties.
- If it is not isolated, it will produce larger, great-tasting fruit with just a few seeds.
- Best grown in-ground with support of stakes or a cage.

Height: 91 to 122 cm/36 to 48 in. **Spread:** 61 to 91 cm/24 to 36 in.

Days to maturity from transplant: 55-60, for green; 75-80 for full ripe Seed supplied as: Raw with 85% Min. Germ. Standard

NEW Pepper F1 Peppi Series

NEW Red: Fruit changes from green to red.

NEW Yellow: Fruit changes from green to yellow.

NEW Red

NEW Pepper F1 PeppiGrande Red

• Corno-shaped pepper has outstanding crisp texture, rich flavour and more sweetness than large-fruited peppers.

• Fruit is often seedless, which means less preparation time for chopping and cooking; great on the grill or baked stuffed with cheese.

• To produce seedless fruit, grow it in isolation from other (non-seedless) pepper varieties.

 \bigcirc

Height: 91 to 122 cm/36 to 48 in. Spread: 61 to 91 cm/24 to 36 in.

Days to maturity from transplant: 60-65, for green; 80-85 for full ripe Seed supplied as: Raw with 85% Min. Germ. Standard

NEW Pepper F1 PeppiGrande Red

- If it is not isolated, it will produce larger, great-tasting fruit with just a few seeds.
- Best grown in-ground with support of stakes or a cage.

NEW SimplySalad[®] Pro San Mixture

• A mix of Asian greens – mizuna and komatsuna – that were selected for late bolting and uniform growth.

- Leaves have attractive lobed and serrated leaf shapes in bright purple and green shades.
- Classic flavour is perfect for salads or braising.
- Cut at junior leaf stage 25-35 days from sowing or at full leaf stage 35-45 days from sowing.
- Cut leaves 5 cm/2 in. above soil level and foliage will re-grow to junior leaf size approximately 10 days later

Height: 20 to 30 cm/8 to 12 in. Spread: 15 to 30 cm/6 to 12 in. Days to maturity from direct seed: 25-45 Days to maturity from transplant: 15-30 Seed supplied as: Precision Multi-Pellets with 90% Min. Germ. Standard

NEW SimplySalad[®] Pro Tatu Mixture

• A mixture of Asian mustard and komatsuna greens that were selected for late bolting and uniform growth.

- Leaves have attractive lobed and frilled leaf shapes in deep purple and bright green shades.
- Spicy flavour is perfect for salads or braising.
- Cut at a junior leaf stage 25-35 days from sowing or at full leaf stage 35-45 days from sowing.
- Cut leaves 5 cm/ 2 in. above soil level and foliage will re-grow to junior leaf size approximately 10 days later.

Height: 20 to 30 cm/8 to 12 in. Spread: 15 to 30 cm/6 to 12 in. Days to maturity from direct seed: 25-45 Days to maturity from transplant: 15-30 Seed supplied as: Precision Multi-Pellets with 90% Min. Germ. Standard

NEW Squash F1 Autumn Frost

- Uniquely ribbed, round fruit ripens to dark tan with a frosted overlay.
- Fruit is similar in taste to a butternut squash, with superior quality, rich flavour and a shelf life of up to 4 months after maturity, allowing for a supply of high-quality fruit throughout the Winter season.
- Fruit can be prepared like a winter squash; cut lengthwise or cut the top 5 cm/ 2 in. off, scoop seeds out and roast; perfect for stuffing.
- Best grown in-ground.

Height: 20 to 30 cm/8 to 12 in. Spread: 244 to 355 cm/96 to 132 in. Days to maturity from direct seed: 100-105 **Seed supplied as:** Raw with 85% Min. Germ. Standard
